## DP and IGCSE Exams

Our G10 and 12 students are presenting themselves as calm and focused prior to exams, and usually content following them. We continue to support them with our prayers and best wishes.

## Dual Citizenship

Some/many students have dual citizenship, yet this information is not disclosed at the time of admission. There have been a few instances during the year when a student or parent has stated that our information is incorrect, but when we check the information provided on admission application forms, such information has not been provided. Parents are requested to advise Bijoux by next Friday, if their son/daughter has dual citizenship (and was not included on their admission application form) and provide a biodata page for documentation. With this advice, please nominate which nationality should be listed first.

## TIS Staffing for 2016/2017

30 April was the last day for teaching staff or school to determine renewal of contracts.

For 2016/2017, it is critical that we right-size our staffing to avoid excess personnel which restricts the effectiveness of the school budget, and consequently, school programs. Some teachers have tendered their resignation and some will not have their contracts renewed. This process is always difficult, however, these decisions must always best serve the school and also meet our students' interests to ensure their success. Nevertheless, TIS values the contributions of its staff and those leaving the TIS family at the end of the year will be acknowledged on Achievers' Day.

Importantly, all staff who were offered renewal contracts have accepted. All key positions have been filled and details will be announced during Achievers' Day.

### Creative Arts Update

## WHY STUDY CREATIVE ARTS

individual as everything we do goes through a process of finding, engagement and

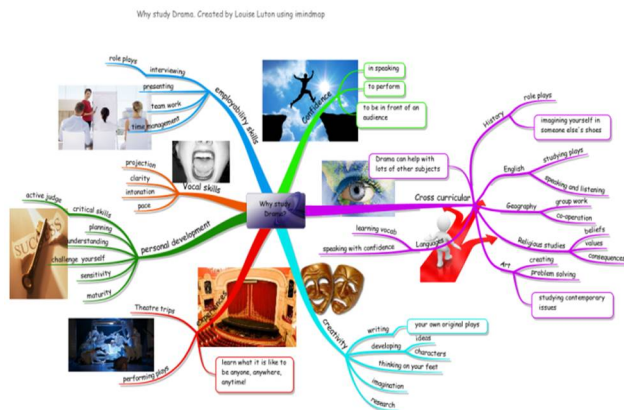

The Creative Arts is second nature to the life of any

expression. A child is borne into a world (stage) and engages with the world in finding the self (identity) in becoming an individual. During this process of finding and discovering, one engages with a number of encounters that happen in society and with people. These encounters are creative encounters and its expression is the art.

## Microscope on Drama and Theatre - Part I

D-R-A-M-A?!? 😊😊

Let us solve this equation!!!

If  $1+1=2$

What will be the result of feeling + behavior + expression =??????

Drama is a fundamental human activity and an essential form of human behavior in all cultures and society. It is a dynamic tool to explore and express human feeling and gives an important access to the understanding of what constitutes meaning in human relations.

A high degree of thinking, feeling and moving is involved and subsequently aids in the development of skills for all other learning within and outside of schools (transfer of learning).

Drama develops:

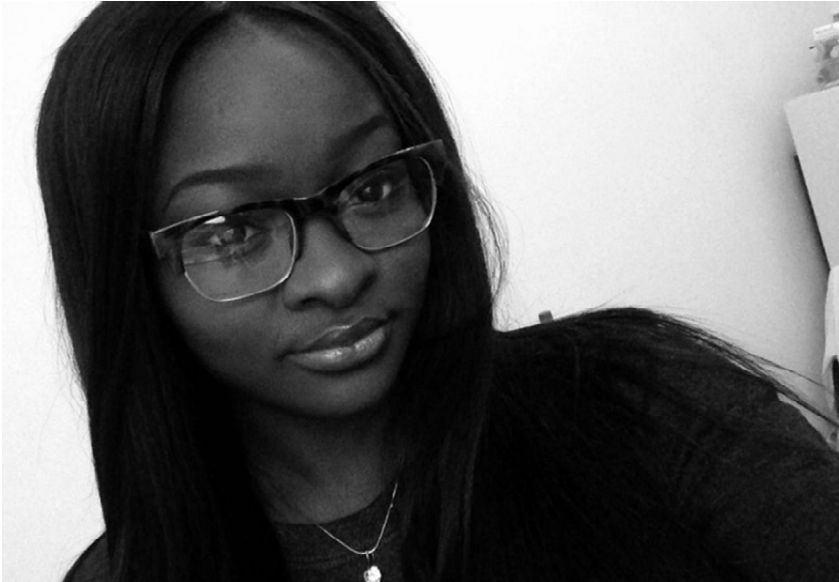

- the use of imagination
- powers of creative self-expression
- decision making and problem solving skills
- a deeper understanding of self and the world
- development of communication, listening and empathy skills
- self-confidence, a sense of worth and respect and consideration for others.

Putting all these learning outcomes and more together, one is bound to develop life skills that will make you versatile and malleable to fit in and apply to any situation. The understanding and grooming of the individual is engaged with and unearthed through ones relationship and engagement with drama.
